

# Site Equipment Information for Yosemite Upper Pines Campground

The attached list shows parking pad and campsite information about each site in Yosemite's Upper Pines campground. The list shows the following information:

Column	What it Means
Type	Number between 1 and 6 that shows recommended equipment that can be used at the site. Look at the comments below for actual enforcement rules. The types are: <ol style="list-style-type: none"> <li>I. Tent only, no trailers or Rvs</li> <li>II. Pickup with camper up to 21 ft.</li> <li>III. Pickup with camper up to 24 ft. or tent trailer</li> <li>IV. RV up to 35 ft. or trailer up to 24 ft.</li> <li>V. RV up to 27 ft. or trailer up to 18 ft.</li> <li>VI. RV up to 35 ft. or trailer up to 35 ft.</li> </ol>
Site #	Site number, 1-240, corresponds to site number on the map
Dimensions	Information about the parking pad size, in the following order: length, width, space behind pad for vehicle overhang. NC means no space behind pad (trees in the way, etc.), clear means no obstructions behind pad. Parking pads are either long (28-40 ft.) and narrow (10 ft.) so that vehicles must park in a line, or shorter (20-28 ft.) and wider (20 ft.) so that vehicles must park side-by-side.
Comments	Additional information about the site, whether shade or sun, how close to rest room, how close to creeks or roads, etc.

I got this list from Catherine in the Yosemite Campground office (located in the Day Use parking lot at Curry Village, phone number 209-372-0300). She said the site types are just guidelines - rangers don't actually measure your vehicles to make sure they match what the list says. They have two enforcement rules. First, all wheels of all vehicles must be on the pad pavement. Second, no part of any vehicle can extend into the camp road. ~~Think about what the list says~~ - for example it says Site 215 is Type 6, but I don't see how the 21x20 pad will hold a 35 ft. RV.
